

Waste Site Reclassification Form

Date Submitted: 3/30/2000	Operable Unit(s): 200-PO-2	Control Number: 2000-022
Originator: B. H. Ford	Waste Site ID: 202-A HWSA	
Phone: 372-9242	Type of Reclassification Action:	
	Rejected <input checked="" type="radio"/>	
	Closed-Out <input type="radio"/>	
	No Action <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

The site was located north of the 202-A Building and east of the 2714-A Chemical Warehouse in the 200-East Area. All <90 day storage pads were removed when PUREX was closed down and cleaned to meet the deactivation end point criteria prior to transition from Westinghouse Hanford Co. to Bechtel Hanford Inc. (BHI).

RECEIVED
OCT 03 2000
EDMC

Basis for reclassification:

Removal of any remaining waste associated with this 90 day pad was achieved in the PUREX deactivation end point "202-A Facility Exterior, Case 3, Remove/dispose of radioactive, dangerous, and mixed wastes in accordance with approved waste handling procedures." All dangerous wastes and dangerous waste residues have been removed to meet the end point criteria and verified during transition walkdowns per L.D. Stefanski. Thus, WAC 173-303-630(10) has been met for this 90 Day Pad.
