**Expedited Response Action Proposal**  
**Comment**

The Fact Sheet received May 18 states in Alternative 2 that  
cleanup levels will be consistent with a residential risk scenario.

As a taxpayer, I strongly object to the cost of a residential standard where no residences will ever be.

No developer in his right mind would even think of a residential development on the working areas of Hanford. Get real.

The standard should be "public forever excluded" or "heavy manufacturing."
