WASTE SITE RECLASSIFICATION FORM

Operable Unit: 200-EA-1 **Control No.:** 2017-007

Waste Site Code(s)/Subsite Code(s):
UPR-200-E-62

Reclassification Category: Interim Final
Reclassification Status: Closed Out No Action Rejected
RCRA Postclosure Consolidated None
Approvals Needed: DOE Ecology EPA

Description of current waste site condition:
(What is the current physical state of the site? What activities have been performed?)
The UPR-200-E-62 waste site addresses a one-time release of a small volume of radiologically contaminated liquid from a pressure test assembly during transport. Impacted soils were excavated and disposed the day after the event and the location was released from further radiological posting status. The site is in a vegetation-free area located near a former storage area and adjacent to the 218-E-12B Burial Ground.

Basis for reclassification:
(How does the site meet the reclassification status?)
Contamination released at the location was promptly removed and disposed; there is no potential for residual hazardous waste associated with the release.

WASTE SITE RECLASSIFICATION FORM

Operable Unit: 200-EA-1

Control No.: 2017-007

Waste Site Code(s)/Subsite Code(s):

UPR-200-E-62

Project Manager comments:

Waste Site Controls:

Engineered Controls: Yes No Institutional Controls: Yes No O&M Requirements: Yes No

If any of the Waste Site Controls are checked Yes, specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents:
