NOTIFICATION FOR REMOVAL OF THE 3745 NATURAL GAS BOILER FROM THE HANFORD SITE AIR OPERATING PERMIT

This is a notification for removal of the 3745 natural gas boiler from Attachment 1 of the Hanford Site Title V Air Operating Permit (AOP), pursuant to Section 4.14 of the AOP. The 3745 boiler, rated at 15 horsepower, is one of 41 boilers included in Notice of Construction approval order 97NM-138, dated June 6, 1997. This boiler appears in Table 1.1 and Table 1.3 of AOP Attachment 1.

The 3745 boiler has been deactivated, removed from its present location, and has assumed a new mission in the 331 Building. It is understood that, while no longer subject to the AOP requirements, this 15 horsepower natural gas boiler will continue to be subject to the general standards for maximum emissions as contained in Washington Administrative Code 173-400-040. If you have any questions, please contact Mary F. Jarvis, of my staff, on (509) 376-2256.

Sincerely,

for Joel Hebdon, Director
Regulatory Compliance and Analysis Division
