Mr. R. D. Izatt, Director
Environmental Restoration Division
U. S. Department of Energy
Richland Operations Office
Richland, Washington 99352

Dear Mr. Izatt:

DRAFT 200-BP-1 OPERABLE UNIT REMEDIAL INVESTIGATION/FEASIBILITY STUDY
WORK PLAN FOR U.S. DEPARTMENT OF ENERGY REVIEW

Enclosed are 20 copies of the above subject report for the U.S. Department of Energy review and comment. Transmittal of this report to the U.S. Department of Energy-Richland Operations Office (DOE-RL) for review is a controlled milestone. This transmittal completes the controlled milestone 19 days before the scheduled completion date of December 31, 1988.

This Work Plan has been through a Westinghouse Hanford Company (WHC) review and comment-incorporating cycle. The format and content of the Work Plan is consistent with the draft U.S. Environmental Protection Agency (EPA) guidance document (OSWER Directive 9355.3-0, March 1988). This document has been cleared from a classification, uncleared controlled nuclear information, and legal/patent standpoint, but contains citations to uncleared references and therefore should not be made available to the general public.

The DOE-RL is requested to provide comments to WHC for incorporation, as appropriate, by February 1, 1989. With receipt and resolution of these comments, WHC is scheduled to revise the Work Plan and submit the revised Work Plan to DOE-RL for transmittal to EPA and the Washington State Department of Ecology by March 1, 1989.

If there are any questions or if additional information is required, please contact Dr. K. A. Gasper of my staff on 376-7000.

Very truly yours,

G. W. Jackson, Manager
Environmental Restoration
Environmental Division
