---	--	--------------------------------------

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

(Summarize status of investigation/remediation of the waste sites.)

The site is a burn pit that is visible in 1948 photos (#901 and #922). The site now appears as a large, vegetation covered field. There are no features that clearly identify the site. The site likely contains burned construction debris.

Basis for reclassification:

(For closeout, reference supporting documentation, as listed in Table 2-3.)

No evidence exists to indicate hazardous, dangerous, or radioactive waste was disposed at this site. No waste materials, distressed vegetation, or other evidence of waste disposal have been found at this site.
