

## Waste Site Reclassification Form

<b>Date Submitted:</b> 2/13/2001  <b>Originator:</b> S. G. Weiss  <b>Phone:</b> 372-9495	<b>Operable Unit(s):</b> 200-ST-1  <b>Waste Site ID:</b> 2607-GF  <b>Type of Reclassification Action:</b> Rejected <input checked="" type="radio"/> Closed-Out <input type="radio"/> No Action <input type="radio"/>	<b>Control Number:</b> 2001-033
--	---	---------------------------------

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

**Description of current waste site condition:**

WIDS site 2607-GF was described in the Hanford Site Waste Management Units Report (Cramer, 1987) as a septic tank and associated drain field. However, it likely does not exist.

**Basis for reclassification:**

It is believed that this septic system does not exist.

1. No drawings have been found that show this septic system.
2. All descriptions of the system can be traced back to a single document, the "Hanford Site Waste Management Units Report" (Cramer, 1987). This document does not list references, so its sources of information cannot be verified. Based on the experience of the WIDS staff, this document has enough errors in it that it should not be relied upon as a sole source of information.
3. In 1996, a comprehensive list of active and inactive 200 Area septic systems was documented in the "200 & 600 Area Sanitary Waste Water Master Plan". The 2607-GF septic system is not included in that document.
4. Records show that 2400E facility was serviced by the 2607-E11 septic system from 1948 to 1997. In 1997 the facility was connected to a new regional system numbered 2607-E1A.
