3. **Comment:**

In August 2015, contaminated rabbit feces were discovered in the lawn on the east side of the 242-A Evaporator building. The area was decontaminated as much as practical and then covered with six inches of gravel. The 200-E-307 waste site is a gravel area adjacent to the east side of the 242-A building that is posted with concrete bollards, and Underground Radioactive Material signs.

4. **Is the site a Solid Waste Management Unit?**  Yes

5. **Does the site need to be addressed under a regulatory program? Check first item that applies.**
