Ecology worked with the United States Department of Energy and its contractors on the content of the waiver of Preparedness and Prevention requirements. Ecology confirms that all agreed to changes are incorporated and have been addressed sufficiently. We will incorporate the content of the Supplemental Information in the draft Site-wide Permit, Revision 9.

As Ecology and the Permittees continue to work through the renewal of the Site-wide Permit, Revision 9, there may be additional revisions to this addendum due to reviews and discussions on other addenda in this unit group. Ecology will notify the Permittees of the changes and incorporate the changes in the final draft files for transmittal for public review.

In accordance with Washington Administrative Code 173-303-806(7), the Permittees will comply with the Site-wide Permit, Revision 8C until the effective date of the Hanford Site-wide Permit, Revision 9.
