

March 20, 2018, Meeting Minutes
Plutonium Finishing Plant (PFP)
Bi-Weekly Meeting on Ecology/EPA/WDOH Letters
Ecology Offices, 3100 Port of Benton Blvd. Room 3C

Glen R. Kozak

Date: 4/16/18

Project Manager Representative, DOE-RL

Stacy Aly

Date: 4/19/18

Project Manager Representative, Ecology

Administrative Record (M-83)	H6-08
S. G. Austin, CHPRC	A6-01
N. S. Cruz, CHPRC	A6-01
W. G. Cox, CHPRC	T5-60
L. J. Cusack, CHPRC	A6-01
D. R. Einan, EPA	A3-46
M. T. Hughey, CHPRC	T4-53
G. R. Konzek, RL	A6-38
E. Laija, EPA	A3-46
C. Mathey, WDOH	B1-42
L.C. Petersen, CHPRC	A6-01
S. N. Schleif, Ecology	H0-57
B. J. Stickney, RL	H5-30
T. K. Teynor, RL	A6-38
T. Vaughn, CHPRC	T4-52
K. A. Wooley, CHPRC	T5-60
A. K. Wright, RL	H5-30

The purpose of this meeting was to status the information requested in the January 9, 2018 Ecology/EPA PFP Letter on Creation of Danger and the January 30, 2018 WDOH Letter of Concern. The meeting was combined with the March PFP Project Manager's Meeting and the combined attendance roster is attached.

Meeting Minutes:

Meeting minutes for the March 8th, 2018 bi-weekly meeting were signed.

Ecology and EPA Letter Topics:

Status of Action Items (Ecology/EPA):

Glenn Konzek (RL) provided a status of open action items resulting from the Ecology and EPA January 9th, 2018 letter.

Expert panel is reviewing PFP's causal analysis and the draft version under review is available on the PFP Recovery Updates website.

Final bioassay results have been received. There were 281 bioassays requested, 11 of which were positive. Two of the positives were less than one millirem. Eight of the positives were between 1 and 10 millirem. One of the positives was between 10 and 20 millirem. All the affected workers were assigned to work at PFP. The final results will be available by Thursday March 22, 2018 on the PFP Recovery Updates website. Stephanie Schleif (Ecology) asked if doses have been assigned for those personnel having positive bioassay results. Glenn Konzek (RL) responded yes, and that information would also be available on the website. John Martell (Health) asked if all personnel that had positive results were CHPRC personnel. Glenn Konzek (RL) responded two were MSA employees assigned to PFP, the others were CHPRC employees.

Status of Stabilization and Risk Reduction:

Kelly Wooley (CHPRC) provided an overview of continuing fixative applications and preparations to move the strongback sections into Technical Safety Requirement compliant groupings. The update on the other stabilization/risk reduction activities and air dispersion model revisions are included in the PFP Project Managers Meeting Minutes.

The strategy for resuming demolition was discussed and clarified that the strategy is not a document and the change in strategy will not result in a revision to a "demolition plan". The agenda item wording is agreed to be changed to "provide demolition strategy to regulators". The strategy will be presented to the expert panel for their feedback prior to being provided to the regulators.

Regulator Topics:

No new regulator topics were discussed.

Wrap up and New Action Items:

With approval of the March 8th meeting minutes, all bi-weekly minutes have been approved. There were no new action items for this part of the combined meeting.

WDOH Letter Topics:

Results of electron microscopy particle size analysis:

Linda Petersen (CHPRC) provided an update that the analysis report has not been received from the laboratory. Crystal Mathey (Health) asked if the samples being analyzed were from swipes or air monitor filter papers. Kelly Wooley (CHPRC) responded that the samples were from both sources.

Modeled zone load-out plan and additional air dispersion modeling:

It was discussed that 234-5Z and 236-Z are being modeled separately based on estimates of radiological material left at this point in time. The model does assume each demolished area will be fully loaded out before starting the next area.

Wrap up/Action Items:

The internal dosimetry manuals HNF-55719 and HNF-55720 were received by Health. Crystal Mathey (Health) stated that Health would be sending an email request for answers to follow on questions.

Agreement was made during the PMM to add baseline surveys (including addressing confidence levels) as a subject to this agenda.

There were no new action items for this part of the meeting.

Next Meeting:

April 4, 2018; 3:30-4:30 p.m. at 2430 Stevens Center, room 223

Attachment – Attendance Roster.
