3. Comment:

The underground pipeline is a 3 inch stainless steel inside a 6 inch stainless steel line. The pipeline extends from F cell of the PUREX facility to the 241-AR-151 Diversion Box. It runs west to east along the south side of 202A to a point where it joins V021, V022 and V023 (see 200-E-218-PL) in the same soil trench. The four lines turn northward on the east side of the PUREX facility. Lines V021, V022 and V023 turn into the 241-AW tank farm. V714 continues northward as a single, buried pipeline. It crosses under 4th Street and runs along the west side of the 241-A tank farm. It crosses under Buffalo Ave. to enter the 241-AR-151 diversion box.
