Ms. Alexandra K. Smith, Manager
Nuclear Waste Program
Washington State
Department of Ecology
3100 Port of Benton Boulevard
Richland, Washington 99354

Dear Ms. Smith:

NOTIFICATION OF HANFORD FACILITY RESOURCE CONSERVATION AND RECOVERY ACT PERMIT, CONDITION II.O, GENERAL INSPECTION SCHEDULE FOR FISCAL YEAR 2020

This letter provides notification of the schedule for general inspections planned at the Hanford Facility during fiscal year (FY) 2020 as required by the Resource Conservation and Recovery Act (RCRA) Permit, Part II, Condition II.O, *General Inspection Requirements*. This permit condition requires the permittees to conduct annual general inspections of the 100 Areas, 200 East Area, 200 West Area, 300 Area, 400 Area, and the Columbia River shorelines. These annual general inspections are in addition to the treatment, storage, and disposal unit inspections specified in Parts III, V, and/or VI of the RCRA Permit

The general inspections are performed to identify potential malfunctions, deterioration, operator errors, and discharges that may cause or lead to the release of dangerous waste constituents to the environment or threaten human health. Specific items to be noted include, but are not limited to, remains of waste containers, container labels, or other waste management equipment; solid waste disposal sites not previously identified for corrective action; uncontrolled waste containers (e.g., orphan drums); temporary or permanent activities that could generate an uncontrolled waste form; and unpermitted waste discharges.

The following table identifies the tentative schedule for the RCRA Permit general inspections during FY 2020. The tentative schedule is subject to change based on the availability of the United States Department of Energy (DOE) Richland Operations Office, DOE Office of River Protection, and Hanford Site contractor inspection support staff.

| FY20 Inspection Date | Inspection Title and Location |
|-----------------------------|---|
| April 6-7, 2020 | RCRA Permit Annual General Inspection of 200 East Area |
| May 4-5, 2020 | RCRA Permit Annual General Inspection of 200 West Area |
| June 8-9, 2020 | RCRA Permit Annual General Inspection of 100, 300, and 400 Areas |
| September 7-8, 2020 | RCRA Permit Annual General Inspection of Columbia River Shoreline |

Mission Support Alliance, LLC, Environmental Integration Services (MSA-EIS), along with representatives from other Hanford Site contractors responsible for, and/or knowledgeable of, the areas being inspected will conduct the general inspections. Pursuant to the provisions of the RCRA Permit, Condition II.O.1.d, MSA-EIS will notify the State of Washington Department of Ecology by electronic mail at least seven (7) days prior to each general inspection to address specific details and/or any changes to the tentative schedule contained herein.

The results of the RCRA Permit general inspections will be documented in the RCRA Permit Operating Record. If you have questions regarding the general inspections of the Hanford Facility, please contact Steve A. Szendre, of my staff, at (509) 372-3058.

Sincerely,

Michael B. Wilson, Vice President
Environmental, Safety, Health & Quality
