April 1, 1994

Mr. James D. Bauer, Program Manager
Department of Energy
P.O. Box 550
Richland, Washington 99352

Dear Mr. Bauer:

Re: Modification of Permit Conditions

I received your letter dated March 10, 1994, with the attachment of a plan for preparation of operation maintenance manuals used by the U. S. Department of Energy in order to satisfy the Maintenance and Operations plan requirement for Notice of Construction (NOC) permits: NOC 93-03, NOC 93-04, and NOC 93-05.

After reviewing the plan, we believe the guidelines for procedures are acceptable. DOE has the responsibility to oversee all the procedures to be developed by these guidelines. A procedure will be developed and approved for any air emission control system of each permitted unit. Therefore, the language within Conditions (Condition 4 of NOC 93-3, Condition 5 of NOC 93-04 and Condition 4 of NOC 93-05) on the existing permits should be deleted and replaced with the following: "Energy shall develop and approve an operations procedure for the air emission control system of the unit by using the guidelines of Chapter XVLC of the DOE Order 5480.19. Copies of the procedure shall be available for on site inspection. Upon request, Energy shall send a copy of approved procedures to the department." Please attach this letter to each of the three subject permits.

If you have questions regarding this issue, please call me at (206) 407-7107. Thanks very much for your cooperation.

Sincerely,

Joseph S. Stohr, Manager
Technical Assistance & Regulatory Coordination Section
Nuclear Waste Program
