This form documents agreement among parties listed authorizing classification of the subject unit as Closed Out, Interim Closed Out, No Action, RCRA Postclosure, Rejected, or Consolidated. This form also authorizes backfill of the waste management unit, if appropriate, for Closed Out and Interim Closed Out units. Final removal from the NPL of No Action and Closed Out waste management units will

Description of Current Waste Site Conditions:

(Summarize status of investigation/remediation of the waste sites.)

The 300 Area Sanitary Trenches (300-52) site includes two septic tanks and unlined trenches that were connected to the 300 Area Sanitary Sewer System. While in operation, the site received sanitary waste from throughout the 300 Area and small discharges of chemical waste from the 3713 Sign Shop. On October 1, 1996 the 300 Area Sanitary Sewer System began to discharge to the City of Richland's sewage system. The pipeline to the 300 Area Sanitary Trenches was permanently isolated by welding a plate in place and filling manhole #6 with concrete.

Basis for Reclassification:

(For closeout, reference supporting documentation, as listed in Table 3.)

According to page 50 of the Declaration of the Record of Decision for the 300-FF-1 and 300-FF-5 Operable Units (DOE Document Number 038509), remedial action is not necessary at sanitary sewage waste sites identified within the ROD. Regulator concurrence with supporting documentation eliminates the need for signatures on this form.
