**Importance:** High

Mark,

I have a copy of the "Estimation of Distribution Coefficients and Leachability of Hexavalent Chromium in 100-D Area Hanford Formation Sediments," and am preparing a transmittal to forward to the AR. I will have DOE sign off on the transmittal and forward to the AR. Let me know if there is anything else we can do for you.

Barbara

Barb,

We had talked some time ago about how to get a PNNL document into the administrative record. At that time, we decided that Ecology could simply ask DOE to enter the document into the admin record. The message below is a request to do this.

I have asked Stacey Callison (site lead for the cleanup verification effort) to work with you to make this happen. He will provide you with a copy of the document.

Please contact me and Stacey if you have questions or comments. Otherwise, Stacey will stop by your office late today or tomorrow to arrange this with you.

Regards,

Mark.

Glenn: Ecology requests that the leach rate study completed for the D Area be added to the administrative record for the D Area Operable Units. Thanks, Wayne.
