Re: 200-ZP-1 Operable Unit

Dear Mrs. Wilson:

Thank you for your comments regarding the pump and treat operation proposed for the 200 West Area. The intent of this action is to remove carbon tetrachloride from the aquifer. Carbon tetrachloride is a known carcinogen.

When fully implemented, this action is designed to reduce the amount of carbon tetrachloride that could potentially reach the Columbia River. Currently the operation is running in a test mode. In the tests the treatment system has been able to remove the carbon tetrachloride to below detectable levels.

I have attached a copy of the proposed plan for your review. If you have any questions or concerns, please call me at (509) 376-8631.

Sincerely,

Dennis A. Faulk  
Operable Unit Manager
