Richland, Washington 99352

**FINDINGS:**

On May 23, 2001, the United States Department of Energy, Richland (DOE-RL), submitted a Notice of Construction (NOC) application for T Plant for toxic air pollutant emissions located in the Hanford site's 200 West Area.

In relation to the above, the Department of Ecology, (Ecology) State of Washington, pursuant to RCW 70.94.152, WAC 173-400, and WAC 173-460 makes the following determinations:

- The facility, if operated as herein required, will be in accordance with applicable rules and regulations, as set forth in Chapter 173-400 WAC and 173-460 WAC, and the operation thereof will not result in ambient air quality standards being exceeded. Information submitted in the NOC shows emissions will be below the threshold levels contained in WAC 173-400-110(5)(d), allowing exemption of the proposed activities from New Source Review under WAC 173-400-110.
- The proposed project, if constructed and operated as herein required, will provide all known, available, and reasonable methods of emission control.

**1. LAWS AND REGULATIONS**

All proposed activities conducted within the T Plant Complex stationary source by DOE-RL, referred herein to as the permittee, shall comply with all requirements as specified in:

- RCW Chapter 70.94, Washington Clean Air Act
- WAC Chapter 173-400, General Regulations for Air Pollution Sources
