### Waste Site Reclassification Form

<b>Date Submitted:</b> 3/10/2000	<b>Operable Unit(s):</b> 200-MW-1	<b>Control Number:</b> 2000-016
<b>Originator:</b> Jim Golden	<b>Waste Site ID:</b> 200-W-60	
<b>Phone:</b> 376-6961	<b>Type of Reclassification Action:</b>	
	Rejected <input checked="" type="radio"/> Closed-Out <input type="radio"/> No Action <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

**Description of current waste site condition:**

The salt-dissolving pits were part of a below-grade structure that provided sodium chloride brine used to regenerate the zeolite ion exchange demineralizers that were part of the water treatment system for the 284-W Powerhouse. The facility was cleaned out and demolished in place.

**Basis for reclassification:**

The site is a Waste Management Unit but not a waste disposal unit. No other regulatory authorities apply. Sampling results from similar powerhouse brine pits in the 100-D and 100-B areas show that sodium chloride in the form and concentration that may remain on site is not a hazardous waste, is nondangerous and nonradioactive.
