

Meeting Minutes Transmittal/Approval  
Unit Managers Meeting: Low Level Burial Grounds

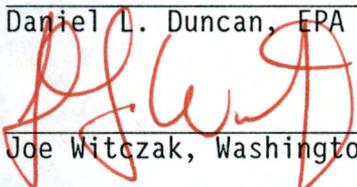

Meeting Held February 27, 1992  
Washington State Department of Ecology  
7601 W. Clearwater Avenue  
Kennewick, Washington

---

Low-Level Burial Grounds Unit Managers' Approval

Not Present Date: \_\_\_\_\_  
Clifford E. Clark, RL, EAP/RPB, Unit Manager

Not Present Date: \_\_\_\_\_  
Daniel L. Duncan, EPA Region 10, RCRA Program Manager

 Date: 5/28/92  
Joe Witczak, Washington State Department of Ecology, Unit Manager

 Date: 5/28/92  
Richard Pierce, WHC, Contractor Representative

---

PURPOSE:

Meeting Minutes are attached. These minutes are from the Unit Managers Meeting held January 22, 1992. Minutes are comprised of the following:

- Attachment 1 - Summary of Discussion and Commitments
- Attachment 2 - Attendance List
- Attachment 3 - Agenda
- Attachment 4 - Action Items List with Status

Attachment #1

Unit Managers Meeting: Low-Level Burial Grounds

Meeting Held February 27, 1992  
Washington State Department of Ecology  
7601 W. Clearwater Avenue  
Kennewick, Washington

Summary of Discussion and Commitments

RL's C. Clark was not able to attend this meeting.

Responses to the Notice of Deficiency

WHC received the NOD on February 20, and has not completed its review. The following NOD comments were discussed:

- Comments 103, 104 & 109. Ecology basically concurs with the WHC response.
- Comment 146. Ecology will approve use of a 3 to 1 slope upon acceptance of the technical references WHC provided. Ecology requested that Item 3 be addressed in the permit application by including language on repair work, and an acknowledgement of Ecology's preference of a safety factor of 2 and a 4 to 1 slope.
- Comment 206. Ecology stated that that there are numerous sections of the WAC 173-303 regulations that are applicable to the handling of releases and release residues. The exact section(s) would depend on the particular task at hand.

Ecology stated that the Navy could submit its responses to the NOD comments a month later, April 30th, which is the deadline for RL's responses.

Backfill Issues

Ecology proposed that the three soil piles near the 183-H basins be used as fill at the LLBG facility, as long as it's below the final cover. This soil is not designated as Ecology dangerous waste, but is above the MTCA health-based standards and/or soil cleanup standards.

Status of Requests for Exemption from Lined Trench Requirements for SRC

Ecology stated that work on the test pad should begin soon, since Ecology requires a test pad run prior to start of construction of the clay liner. The test pad should be built by the same contractor for the LLBG facility. Ecology stated that it will provide WHC with the technical and regulatory requirements for using a test pad and infiltrometer testing at LLBG.
