3. **Comment:**

Drawing H-2-44501, sht 73 has rectangle feature and a notation for a "former non-radioactive burial site". The note states the fence has been removed. No other information has been found related to this drawing note.

Based on the coordinates of the rectangle on H-2-44501 and the recently mapped pipeline sites, the Replacement Cross Site Transfer Line (600-269-PL) runs through a portion of the former burial site. It was installed in 1995. The average depth of the 600-269-PL pipeline is 8 feet below ground surface. The excavation layback for the pipeline would have been approximately 24 feet. No unusual discovery items were reported to the WIDS database.

The former burial site is considered Not Accepted because the location was excavated to install a known pipeline. Because the notation on H-2-44501 describes the rectangle as a "former" burial site with the fence removed, it is believed the buried items were previously exhumed.

4. **Is the site a Solid Waste Management Unit?**

Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (for example through spills), and includes dangerous waste treatment, storage, and disposal units.

 Yes No5. **Does the site need to be addressed under a regulatory program? Check first item that applies.**
