I would like to understand how these "change packages" work. When/if agreed upon, do they become part of an existing contract under a "changes" clause? Or are they negotiation or bid upon @ time of being agreed upon? Is funding available now? or does it come in increments after the contract is entered into? Will the performance be based on fixed price terms - or cost type - bonus? etc. Will contracts be with/by US DOE? USEPA? Washington State Ecology?

Please send me the mechanics of the matter.
