Olympia, Washington 98504-7699

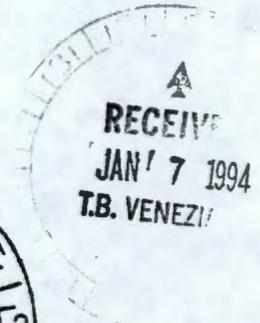

Dear Messrs. Hofer and Stanley:

EIGHTY PERCENT DESIGN REPORT FOR THE 200 AREA TREATED EFFLUENT DISPOSAL FACILITY COLLECTION SYSTEM (PROJECT W-049H)

Reference: Letter, G. Anderson, Ecology, to J. D. Bauer, RL, "Eighty Percent Design Submission, Project W-049H NOD Response Table, M-17-08," dated March 29, 1993. 27804

The referenced letter has requested that follow-up information be provided with respect to the U.S. Department of Energy, Richland Operations Office (RL) responses to Ecology's comments on the eighty percent design report on the W-049H collection system. Our responses had been furnished to Ecology by RL letter, Hennig to Day/Jansen, "Responses to Ecology Comments on Eighty Percent Design Report for 200 Area TEDF, Project W-049H," dated March 11, 1993. 27054

In effect the referenced letter requested that two collection system specification sections be submitted to Ecology for approval. These are Section 01100 which pertains to disposal of hazardous materials found during construction, e.g waste lubricating oils and engine coolant, and Section 02650 which pertains to pressure testing procedures. Both of the above sections, along with other related matters, had been discussed with Ecology's Mr. Gary Anderson at a meeting with him in Richland on March 24, 1993. Then subsequent to the above meeting we received a letter from Mr. Anderson March 30, 1993 which stated that, after a review of all collection system plans and specifications, the eighty percent design report and the NOD responses, construction on W-049H could proceed. Copies of these sections, which had been provided to Mr. Anderson informally after the March 24 meeting, are therefore forwarded for your information.

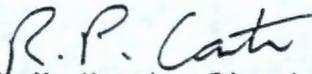

Messrs. Hofer and Stanley

-2-

Should you have any questions, please contact Dana C. Bryson of the Waste Management Division on (509) 372-0738.

Sincerely,

for J. M. Hennig, Director
Waste Management Division
