

### Waste Site Reclassification Form

<b>Date Submitted:</b> 11/29/1999 <b>Originator:</b> J.R. James <b>Phone:</b> 373-6372	<b>Operable Units:</b> 300-FF-1 <b>Waste Site ID:</b> 316-5 <b>Type of Reclassification Action:</b> Closed Out: <input checked="" type="checkbox"/> Interim Closed Out: <input type="checkbox"/> No Action: <input type="checkbox"/> RCRA Postclosure: <input type="checkbox"/> Rejected: <input type="checkbox"/> Consolidated: <input type="checkbox"/>	<b>Control Number:</b> 99-108  <b>Form Status:</b> Approved
--	--	---

This form documents agreement among parties listed authorizing classification of the subject unit as Closed Out, Interim Closed Out, No Action, RCRA Postclosure, Rejected, or Consolidated. This form also authorizes backfill of the waste management unit, if appropriate, for Closed Out and Interim Closed Out units. Final removal from the NPL of No Action and Closed Out waste management units will occur at a future date.

**Description of Current Waste Site Conditions:**

(Summarize status of investigation/remediation of the waste sites.)

Remediation of the 300 Area Process Trenches (300 APT) (official WIDS site code 316-5) was completed in accordance with the 300-FF-1 Remedial Design/Remedial Action Work Plan. During the excavation process, 16 Unplanned Releases were also remediated. Reclassification authorization is provided via the U.S. Department of Energy, U.S. Environmental Protection Agency and the Washington State Department of Ecology approved NPL Agreement form, Control Number 121, signed May 1998

**Basis for Reclassification:**

(For closeout, reference supporting documentation, as listed in Table 3.)

J. A. Lerch, 1998, 300 Area Process Trenches Verification Package, BHI-01164, Bechtel Hanford, Richland, Washington

300 NPL Agreement/Change Control Form, Control Number 121, March 24, 1998. Approved by DOE, Ecology, and EPA signatories: R.G. McLeod, T. A. Wooley, D. R. Einan.

Acceptance of Certification of the 300 Area Process Trenches Clean Closure of the Soil Column and Ground Water Corrective Action Requirements; August 10, 1998 letter from T. A. Wooley, Washington Department of Ecology to J. E. Rasmussen, U. S. Department of Energy.

**Waste Site Controls**

Engineered Controls: Yes  No     Institutional Controls: Yes  No     O&M requirements: Yes  No

If any of the Waste Site Controls are checked Yes specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents.

Control Number: <b>121</b>	300 NPL Agreement/Change Control Form  _ Change _x_ Agreement _ Information  Operable Unit(s): 300-FF-1	Date Submitted: March 24, 1998  Date Approved:
Document Number/Title: 300 Area Process Trenches Verification Package (BHI-01164)		Date Document Last Issued: N/A
Originator: J.R. James		Phone: 373-6372
<p><b>Summary Discussion:</b> (316-5)</p> <p>Remediation of the 300 Area Process Trenches (300 APT) was completed in accordance with the 300-FF-1 Remedial Design Report/Remedial Action Work Plan (RDR/RAWP)(DOE/RL-96-70) and was performed under CERCLA as an integrated activity with RCRA closure of the TSD unit. Bird screens that covered the trenches, the concrete headworks structure and associated piping, the blockhouse structure, and contaminated soil were demolished or excavated and transported to the ERDF for disposal. During the excavation process, 16 unplanned releases to the process trenches were also remediated. Remaining soil within the ACL and UCL areas of the process trenches and from beneath the concrete aprons that were part of the headworks structure were sampled, analyzed, and found to be below the 300-FF-1 Operable Unit ROD cleanup standards and 300 APT closure plan performance goals. This is demonstrated in the referenced verification package. The process trenches are therefore verified to be remediated and to no longer pose an unacceptable threat to human health or the environment in an industrial setting. Certification of closure will be documented separately by an independent PE and issued to Ecology and Benton County.</p>		
<p><b>Justification and Impact of Change:</b></p> <p>This form documents agreement among the parties listed below that closure of the waste site soils has been achieved as discussed above. Final removal from the NPL will occur at a future date.</p>
