

Waste Site Reclassification Form

Date Submitted: 2/5/2001 Originator: S. G. Weiss Phone: 372-9495	Operable Unit(s): 200-ST-1 Waste Site ID: 2607-EH Type of Reclassification Action: Rejected <input checked="" type="radio"/> Closed-Out <input type="radio"/> No Action <input type="radio"/>	Control Number: 2001-024
---	---	---------------------------------

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

WIDS site 2607-EH has been described as a septic tank and associated drain field. This septic system has been described as being located the west side of Baltimore Avenue adjacent to the east side of the 2101-M Building.

Basis for reclassification:

Evidence indicates that this septic system does not exist.

1. No drawings have been found that show this septic system.
2. All descriptions of this system can be traced back to a single document, the "Hanford Site Waste Management Units Report" (Cramer, 1987). This document does not list references, so its sources of information cannot be verified. Based on the experience of the WIDS staff, this document has enough errors in it that it should not be relied upon as a sole source of information.
3. In 1996, a comprehensive list of active and inactive 200 Area septic systems was documented in the "200 & 600 Area Sanitary Waste Water Master Plan", WHC-SD-LL-SP-001. The 2607-EH septic system is not included in that document.
4. Records show that the 2101-M Building and adjacent facilities were serviced by the 2607-E8 septic system until 1996. After 1996, the facilities were serviced by a new regional system numbered 2607-E8A.
