Conservation and Recovery Act Permit for the Treatment, Storage, and Disposal of  
Dangerous Waste, Chapter 10 and Attachment 51, 'Waste Treatment and  
Immobilization Plant.'"

This letter transmits Permit Design Package Low-Activity Waste (LAW)-024, "Miscellaneous  
Treatment Unit Subsystem Equipment for LAW Facility LVP System," for the State of  
Washington Department of Ecology (Ecology) review and approval.

The attached LAW Vitrification Facility permit package provides the information necessary for  
Ecology to confirm that the structures, equipment, and processes described in the permit package  
will comply with the Reference. This information will allow Ecology to permit the installation  
of the secondary offgas/vessel vent process system miscellaneous treatment unit subsystem

A summary description of the permit package is included in Attachment 1. Attachment 2  
provides the permit design package and Attachment 3 provides the Bechtel National, Inc. and  
U.S. Department of Energy, Office of River Protection certification statements.

Dangerous Waste Permit (DWP) package submittals are certified coincident with issuance of the  
integrity assessment report contained in the package. Permit affecting design changes not  
included in, or occurring after issuance of, the final integrity assessment report will be processed  
in accordance with DWP requirements for permit modification prior to construction or  
installation of affected equipment and components. Installation of equipment and components  
will be done in accordance with permit packages approved and incorporated into the DWP by
