Richland, Washington 99352

Dear Mr. Bauer:

Re: Response to Letter Concerning Site Characterization, Project W-049H,
92-WOB-381

We have reviewed your letter of September 24, 1992, concerning the site characterization work plan for the W-049H Treated Effluent Disposal Site.

We accept this plan as you have agreed to modify it.

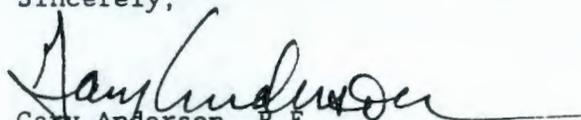

You state that additional simulations of hydrologic flow will be calculated when data becomes available. On what date do you anticipate this work being done? Can this work be included in the annual site-wide ground water monitoring report?

Do you have any plans to coordinate site specific data of this sort with other site data, so as to produce a result for the entire Hanford Reservation? The ground water does not respect site boundaries.

Please continue to coordinate your activities in characterizing this work with our RCRA hydrogeologist Krystyna Kowalik.

If you have questions about this letter, please call me at (206) 438-7558.

Sincerely,

Gary Anderson, P.E.
Nuclear and Mixed Waste Management
