

## TRI-PARTY AGREEMENT

Change Notice Number TPA-CN- 0896	TPA CHANGE NOTICE FORM	Date: August, 2020
Document Number, Title, and Revision: DOE/RL-2012-20, <i>Waste Control Plan for the 200-DV-1 Operable Unit</i> , Rev. 0		Date Document Last Issued: June 16, 2015
Approved Change Notices Against this Document: TPA-CN-0800		
Originator Mark E. Byrnes		Phone: 509 373-3996

**Description of Change:**  
DOE/RL-2012-20, Rev. 0, is amended to add borehole ID numbers for three new boreholes to be installed.

                    M. W. Cline                     and                     D. Goswami                     agree that the proposed change  
**DOE** **Lead Regulatory Agency**

modifies an approved workplan/document and will be processed in accordance with the Tri-Party Agreement Action Plan, Section 9.0, *Documentation and Records*, and not Chapter 12.0, *Changes to the Agreement*.

Table A-1 is updated to add three new boreholes needed to characterize the 216-S-13 crib and the 216-T-19 crib and tile field.

Additions are shown using double underline. Deletions are shown using ~~strikeout~~.

Note: Include affected page number(s): A-4

**Justification and Impacts of Change:**  
One borehole is needed at each waste site (216-T-19 [D0208] and 216-S-13 [D0209]) to collect discrete soil samples from the shallow zone (0 to 15 ft bgs) for PCB/PCB Congener analysis. One borehole at waste site 216-S-13 (D0211) is needed to collect additional soil samples for characterization and evaluation of applicable radiological, inorganic, and organic constituents. In addition, the borehole will be drilled up to 25 feet below the water table. Groundwater samples will be collected from depths of 5, 10, and 25 feet below the water table and analyzed for MIBK, hexavalent chromium, and uranium in addition to the 200-UP-1 COCs listed in DOE/RL-2014-27, Rev 2.
