3.	<p>Comment:</p> <p>The waste site is two, parallel pipelines buried in the same soil trench. Each pipeline is a 2 inch diameter carbon steel pipe inside a 4 inch diameter carbon steel pipe. One pipe transferred radioactive feed material from tank 241-AP-102 to the Grout Treatment Facility. The other pipe transferred excess water from the Grout Treatment Facility landfill to the 241-AP-102 tank. Line SN-621 is the Grout Facility Feed Line. The pipelines are covered with a soil berm. The material transferred from tank 241-A-102 via line SN-621 connected to the Grout facility Liquid Collection Tank (LCT).</p> <p>The LCT contained equipment that included grout mixers and pumps. The technology and process operation of the GTF was demonstrated from August 1988 through July 1989 with the treatment of 3,785,400 liters (1,000,000 gallons) of radioactive, non-dangerous waste. Processing of this waste generated leachate that was a corrosive mixed waste. The leachate was stored at GTF and later transferred back to the Double Shell Tank System.</p> 																																		
4.	<p>Is the site a Solid Waste Management Unit?</p> <p>Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (for example through spills), and includes dangerous waste treatment, storage, and disposal units.</p>		<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

DISCOVERY SITE EVALUATION CHECKLIST

Petroleum UST or contaminated soil from a petroleum UST leak (WAC 173-360)	Petroleum UST	Accepted	<input type="checkbox"/>
Underground injection well that received noncontaminated effluent (e.g., storm water runoff, steam condensate, air conditioner condensate) (WAC 173-218)	Underground Injection Control Well	Accepted	<input type="checkbox"/>
Other liquid disposal site with a State waste discharge permit (WAC 173-216)	State Waste Discharge	Accepted	<input type="checkbox"/>
Septic system for which there is no expectation of radioactive or dangerous waste discharge (WAC 246-272 or WAC 246-272B)	Septic	Accepted	<input type="checkbox"/>

6. Assign the site to an operable unit or waste management area. Write 'Not Applicable' if neither applies. (JBD) 200-15-1

7. Ecology and EPA Approvals:

8. Are any other activities needed or desired at the site? Only answer if no items in question 5 were checked. Check first item that applies.

General Description	Unit Category	Classification	Check Here
A location where remediation is not needed, but debris removal or other miscellaneous restoration activities may be performed	Miscellaneous Restoration	Accepted	<input type="checkbox"/>
A location where no remediation, miscellaneous restoration, permit closure or other physical (e.g., waste site remediation) or administrative (e.g., permit closure) activity is needed	Not Applicable	Not Accepted	<input type="checkbox"/>

9. DOE Approval:
