

Waste Site Reclassification Form

Date Submitted: 6/2/2004	Operable Unit(s): 200-UR-1	Control Number: 2004-069
Originator: C. R. Webb	Waste Site ID: 600-256	
Phone: 373-5573	Type of Reclassification Action:	
	Rejected: <input type="radio"/>	
	No Action: <input checked="" type="radio"/>	
	Interim Closed Out: <input type="radio"/>	
	Closed Out: <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

Ethylene glycol was added to the tower legs to prevent freezing of water that collected in the winter. The towers were dismantled in 1995. Green liquid was noticed draining from the leg of the first tower leg being cut. Work was stopped. Approximately 2.7 liters of liquid was released to the soil.

The concrete foundation pads and portions of the tower structures are all that remain of the towers. The release site is not marked or posted.

Basis for reclassification:

The site is recommended for reclassification to No Action. Six soil samples were collected. Three samples found less than detectable levels of the ethylene glycol, two samples found levels of ethylene glycol below levels of concern. One sample contained 3830 milligrams of ethylene glycol per kilogram of soil. In April 1995, the contaminated soil was removed. In order to avoid repeating the release at the rest of the towers being dismantled, holes were drilled and the liquid in the remaining legs was properly collected.

It is possible that a maximum of 170 liters (45 gallons) was released. This is much less than the CERCLA reportable quantity (RQ) of 5000 pounds.
