Re: 100-D-9 Boiler Fuel Oil Tank Site, Compliance with Washington Administrative Code 173-360

Dear Mr. Klein:

The Department of Ecology reviewed information provided by the United States Department of Energy (USDOE) for the 100-D-9 Boiler Fuel Oil Tank Site. Washington Administrative Code (WAC) Chapter 173-360 is the Underground Storage Tank regulations for tanks holding petroleum substances. Ecology evaluated the information provided by USDOE for those tank regulations. Ecology finds that the 100-D-9 site is no longer a threat to human health or the environment. Therefore, USDOE has no further environmental liability under WAC 173-360. This finding applies only to the 100-D-9 Boiler Fuel Oil Tank Site.

If you have any questions, contact John Price at 509-372-7921.

Sincerely,

Cheryl Whalen  
Cleanup Section Manager  
Nuclear Waste Program
