

Waste Site Reclassification Form

Date Submitted: 6/2/2004	Operable Unit(s): 200-UR-1	Control Number: 2004-070
Originator: C. R. Webb	Waste Site ID: 600-260	
Phone: 373-5573	Type of Reclassification Action:	
	Rejected: <input type="radio"/>	
	No Action: <input checked="" type="radio"/>	
	Interim Closed Out: <input type="radio"/>	
	Closed Out: <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

The site was reported to the WIDS database as a suspect waste site in March 1999. Originally the site was an area surrounded with four metal posts and a discolored magenta and yellow rope, with a slight depression in the center. The center of the depression had a flat piece of wood on the ground and two more metal posts. Debris at the site included wire and deteriorated plastic. The discolored magenta and yellow rope appeared to be nylon and had fallen down for approximately half of the site's perimeter. There were no signs posted on the rope and the site did not fall within any larger posted Underground Radioactive Material area. The purpose of the posts and rope have not been determined. It is not known when the area was delineated, but the rope was badly deteriorated in 1999.

Basis for reclassification:

Due to the yellow and magenta rope being present, the area was treated as if it were a Contamination Area during the initial investigation on March 25, 1999. A radiological survey was conducted on March 26, 1999. The ground, vegetation, a wooden board, plastic debris and ants under the wooden board were surveyed. There were no readings above background. When the area was determined not to be contaminated, the ropes and posts were taken down by the Radiological Control Technician. The wooden board and rope were removed from the site. The site is recommended for reclassification to No Action.
