FEDERAL FACILITY AGREEMENT AND CONSENT ORDER CHANGE CONTROL FORM  
Description/Justification of Change

This change control form establishes the submission date for the T Plant treatment by generator (TBG) request as September 30, 1991. This change request affects only that portion of Milestone M-23-01 related to T Plant.

Change Control Form M-23-90-4 extended the submittal date for the T Plant TBG request from June 30, 1990, pursuant to Milestone M-23-01, to September 30, 1990.

A second change request M-23-90-5 was transmitted to the State of Washington Department of Ecology (Ecology) in September of 1990. Ecology took no action on this request. Change request M-23-90-5 sought to extend the T Plant TBG submittal to January 31, 1991. This request was based on the uncertainty in availability of analytical results to support the TBG submittal and resolution of issues associated with Ecology's August 20, 1990, denial of TBG status for other Hanford facilities.

In December 1990 the U.S. Department of Energy, Westinghouse Hanford Company, and Ecology staff met to discuss the reasons for Ecology's August 1990 denial of TBG status for the PUREX, 204-AR and 222-S facilities. This meeting resulted in a substantially different understanding of Ecology's position relative to granting TBG status and, therefore, significant revisions to the T Plant TBG request were required.
