Mr. David B. Jansen, P.E.
Hanford Project Manager
State of Washington
Department of Ecology
Post Office Box 47600
Olympia, Washington 98504-7600

Dear Mr. Jansen:

THE PLUTONIUM FINISHING PLANT LIQUID LOW LEVEL WASTE SYSTEM MODIFICATION,
PROJECT B-680H DESIGN DRAWING AND CONSTRUCTION SPECIFICATIONS - PROFESSIONAL
SEAL

Enclosed is a letter from ICF Kaiser Engineers indicating that the Professional Engineers designing Project B-680H have applied for reciprocity in the State of Washington. Mr. Gary Anderson, State of Washington Department of Ecology, stated in a telephone conversation on June 15, 1992, that a letter indicating reciprocity had been applied for by the Professional Engineers designing Project B-680H would be acceptable, instead of revising the Project B-680H drawings with a Washington State Professional Engineers Stamp.

Project B-680H is one of several projects designed to control and/or remove radionuclides from liquid effluent discharge to the soil column. The scope of this project includes installation of a closed-loop cooling system and a low-level waste treatment facility to provide Best Available Technology/All Known Available and Reasonable Technology treatment in accordance with Milestone Number M-17-16C of Table D-3 of the Hanford Federal Facility Agreement and Consent Order.

Should you have any questions regarding this transmittal, please contact me or Mr. G. R. Mezger of the U.S. Department of Energy, Richland Field Office on (509) 376-5039.

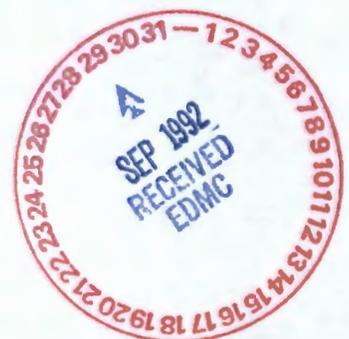

Sincerely,

James D. Bauer, Acting Program Manager
Office of Environmental Assurance,
Permits, and Policy
