Richland, Washington 99352

Re: United States Department of Energy – Richland Operations Office Letter 15-AMRP-0020, Dated November 14, 2014, “Post-Closure Corrective Action Groundwater Monitoring Report for the 183-H Solar Evaporation Basins and the 300 Area Process Trenches: July – December 2012 – Second Semi-Annual Report, SGW-54971, Revision 2”

Dear Mr. Charboneau:

The Department of Ecology (Ecology) has reviewed the referenced report received on November 20, 2014. This report is required under Washington Administrative Code 173-303-645(11)(g) for reporting the effectiveness of the corrective action program.

During Ecology’s review, it came to our attention that the cause for the revision was not explained in the report or transmittal letter. This has made it difficult in determining if the changes made were significant or changed the effectiveness of the corrective action program.

When a report is revised, a list of changes needs to be included as an attachment or appendix to the report or in the transmittal letter. The list needs to include the page and paragraph of where the change was made, along with a brief summary or reason for the change.

Ecology is requesting a list of changes for this report and all future revised reports.

If you have any questions, please contact Jeff Ayres, Hydrogeologist, at [jeff.ayres@ecy.wa.gov](mailto:jeff.ayres@ecy.wa.gov) or (509) 372-7881.

Sincerely,

Cheryl Whalen  
Cleanup Section Manager  
Nuclear Waste Program
