

Waste Site Reclassification Form

Date Submitted: 6/3/2004 Originator: C. R. Webb Phone: 373-5573	Operable Unit(s): 200-UR-1 Waste Site ID: UPR-200-W-83 Type of Reclassification Action: Rejected: <input checked="" type="radio"/> No Action: <input type="radio"/> Interim Closed Out: <input type="radio"/> Closed Out: <input type="radio"/>	Control Number: 2004-084
--	--	---------------------------------

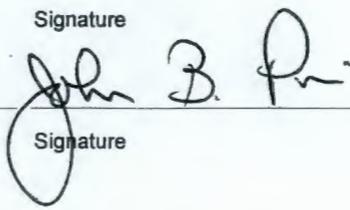

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

The release occurred at the 204-S Railroad Car Unloading Facility. The release contaminated the step-off pad outside the 204-S radiation zone at the 204-S Unloading Facility. Improper handling of contaminated trash was the primary cause of the contamination spread. Immediately after the release in 1981, the site was secured, stabilized, and decontamination was initiated. The unloading station and the 203-S, 204-S, 205-S facilities were decontaminated and decommissioned in December 1983. The area where unloading station and the 203-S, 204-S, 205-S facilities were located was backfilled and surface stabilized. It is a posted Underground Radioactive Material area that was given the WIDS sitecode number 200-W-22.

Basis for reclassification:

The release site is located within the boundaries of the stabilized area known as 200-W-22. It is recommended this site be reclassified to Rejected (Consolidated) with WIDS sitecode 200-W-22.
