Paula Call:

I am in general agreement with the Negotiations Conclusion Agreement signed by RL, Ecology and EPA on 1/15/09. I also understand that some milestones may be accelerated using ARRA (American Recovery and Reinvestment Act) funding. In addition, I would like to see the following four items considered:

1. Accelerate PFP (Plutonium Finishing Plant) cleanout and removal down to the concrete floor slab (D4).
2. Accelerate RSW (Retrievably Stored Waste) retrieval, designation, storage, and treatment/processing (Milestones M-091-00 and M-091-01), and dispose of as much as appropriate onsite at ERDF or off-site at WIPP or other approved location.
3. As per the note at the end of Milestone M-091-00, promptly establish schedules for the management of pre-1971 TRU/TRUM pursuant to applicable provisions of the HFFACO following the issuance of Operable Unit Records of Decision, then retrieve, designate, store, treat/process, and dispose off-site at WIPP.
4. Accelerate characterization of both the 618-10 and 618-11 Burial Grounds, then excavate, loadout and bury at ERDF as much of all trench materials as possible, and develop Work Plans for removal of the Vertical Pipe Units and Caissons at both burial grounds.
