P.O. Box 969
Richland, Washington 99352-0539

Dear Mr. Keen:

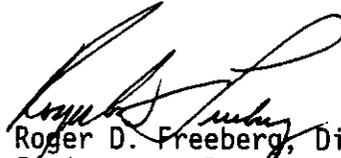

PROJECT W-296, ENVIRONMENTAL RESTORATION DISPOSAL FACILITY, CONCEPTUAL DESIGN REPORT (CDR)

The subject report has been reviewed by the Richland Operations Office, the U.S. Environmental Protection Agency, and the State of Washington Department of Ecology. All comments from that review have been resolved. The resolutions are enclosed. They have been separated by reviewing organization.

No revisions to the CDR need to be made to incorporate the comment resolutions. You are directed, however, to combine the existing CDR with the enclosures and this transmittal letter in one consolidated package. The CDR and the comment resolutions are to be used in combination for subsequent stages of design.

Based on the above direction, the Conceptual Design Report is approved. If you have any questions, feel free to contact Michael Collins at 376-6536.

Sincerely,

Roger D. Freeberg, Director
Environmental Program Division
