Dear Mr. Nord:

REVISION TO THE DANGEROUS WASTE PART A PERMIT APPLICATION (WA7890008967)
(TS-3-1)

- References:
- (1) DOE letter, R. D. Izatt and R. E. Lerch to R. F. Stanley, Ecology, Dangerous Waste Part A Permit Application for 300 Area Waste Acid Treatment System, Revision 2, dated May 19, 1988.
 - (2) DOE letter, J. J. Keating to R. Russell, EPA and A Riniker, Ecology, Dangerous Waste Part A Permit Application for 311 Tanks, Revision 1, dated September 30, 1987.

Enclosed is the Dangerous Waste Part A Permit Application Form 3, Revision 3, for the 300 Area Waste Acid Treatment System (300 Area WATS). The 300 Area WATS was used for the storage and treatment of mixed waste generated during the fuel fabrication operation in the 300 Area of the Hanford Site.

The 311 Tanks are integral components of the 300 Area WATS and only one closure plan is being prepared to address both these waste management units. To reflect this approach, the enclosed permit application revision combines what were formerly two waste management units (i.e., 311 Tanks and 300 Area WATS, referenced above) into one (i.e., 300 Area WATS). This revision also includes changes to the initial date of operation for the 311 Tanks, process description changes, the identification and description of additional dangerous waste codes and their related estimated annual quantities, facility drawing modifications, and additional photographs. These changes are based on an evaluation performed in support of the 300 Area WATS Closure Plan which is to be submitted to the Washington State Department of Ecology by June 30, 1990 (Hanford Federal Facility Agreement and Consent Order Milestone M-20-10).
