Re: Approval of Remedial Design Report for the 200 ZP-1 IRM
Phase II and III

Dear Ms. Wanek:

44819

The U.S. Environmental Protection Agency (EPA) has completed the review of the 200-ZP-1 Phase II and III Remedial Design Report rev 1. The revision to the remedial design report has adequately addressed the concerns raised in EPA's initial review. Therefore, EPA is pleased to approve the Remedial Design Report for the 200-ZP-1 operable unit.

This letter also constitutes approval to eliminate round two groundwater sampling. It is EPA's understanding that section 7.3.2 of the document supersedes the requirements detailed in the sampling and analysis plan for round two samples.

If you have any questions feel free to contact me at (509) 376-8631.

Sincerely,

Dennis Faulk
Operable Unit Project Manager
