Description of current waste site condition:

This release was documented on a Radiation Occurrence Report dated 5/4/66, written by Harold Maxfield and in RHC-CD-673, also written by Harold Maxfield. This contributed to the information being documented in WIDS twice. UPR-200-W-62 is duplicate information for this event, also documented in UPR-200-W-97.

Basis for reclassification:

This site should be Reject Consolidated into UPR-200-W-97 because it is a duplicate entry in the WIDS database.
