**LLBG PROJECT MEETING**

**825 Jadwin/Room 340**

**Hanford, Washington**

**May 22, 2008**

**11:00 a.m. to 11:15 a.m.**

**Agenda**

- I. Approval of April 24, 2008 LLBG Project Meeting Minutes  
(Ecology/DOE-RL/FH)
- II. Operational Status
- III. Project Specific Issues
  - A. Part B Permit Application Status
  - B. Groundwater Sampling Schedule
- IV. General Discussions
- V. Status of Actions
- VI. New Action Items
- VII. Documents for Submittal to the Administrative Record
- VIII. Next Project Managers Meeting

## LLBG PROJECT MEETING MINUTES

Project Managers Meeting  
825 Jadwin/Room 340/700 Area  
Richland, Washington

May 22, 2008

- I. Approval of April 24, 2008 LLBG Project Meeting Minutes (Ecology/DOE-RL/FH). The PMM minutes were approved.
- II. Operational Status
  - Mixed Waste Received in April  
96.17 M3 462 55-gallon drum equivalents
  - Mixed Waste Transferred Onsite in April  
191.64 M3 920 55-gallon drum equivalents
  - 0 defueled reactor compartments received in April
- III. Project Specific Issues
  - A. Part B Permit Application Status  
During the T Plant PMM immediately preceding this PMM, Ecology proposed a revised process and schedule for permitting. Ecology has decided to eliminate the placeholder concept in the sitewide permit. Ecology is now proposing a different permitting schedule for T Plant, LLBG, CWC and WRAP than proposed by RL/FH. RL/FH and Ecology will have internal discussions with management regarding Ecology's new approach. Ecology will e-mail its proposed schedule, which RL/FH will review and compare with the schedule it provided.
  - B. Groundwater Sampling Schedule  
John Smoot (FH) reported that samples were collected from Low Level Waste Management Area 2 in April 2008, and samples are scheduled to be collected from LLWMA-1 in June 2008.
- IV. General Discussions
  - A. Jennifer Ollero (Ecology) stated that Ecology is considering inserting a compliance schedule in the sitewide permit for submittal of a groundwater addendum, depending on the progress of the groundwater addendum when the parties are ready for review and comment. Tony Miskho (FH) stated that since a statistical approach was agreed to in the NOD resolution, upon evaluation RL/FH have decided on another regulatory option to propose to Ecology that would be consistent with the regulations in the NOD resolution. A meeting will be set up to discuss the subject.
  - B. Ms. Ollero initiated a discussion regarding disposal of the defueled reactor compartments and whether there is room for 200 more reactor compartments in trench 94. RL/FH will verify the capability in burial grounds to accommodate that many reactor compartments.
- V. Status of Actions
  - A. There were no actions to status.
- VI. New Action Items
  - A. There were no new actions identified.

VII. Documents for submittal to the Administrative Record  
A. There were no documents identified.

VIII. Next Project Managers Meeting  
A. The next PMM was scheduled for June 26, 2008.
