Mr. James E. Rasmussen, Director
Environmental Assurance, Permits, and Policy Division
U.S. Department of Energy
Richland Operations Office
P.O. Box 550, MSIN: A5-15
Richland, WA 99352-0550

Dear Mr. Rasmussen:

Re: Engineering Data Transmittals for Pipeline Connections between the 200-UP-1 Operable Unit and the 200 Area Liquid Effluent Retention Facility

The Washington State Department of Ecology (Ecology) has reviewed the engineering data packages for the pipeline tie-ins and integrity test plan submitted by the U.S. Department of Energy (USDOE), Richland Operations Office. Ecology grants approval for construction of the pipelines. Please notify Ecology, as soon as possible, if significant deviations from the approved plans are required.

USDOE must notify Jerry Hensley, of Ecology, in order to coordinate Ecology's inspection of construction and testing activities. Jerry can be contacted at (509) 736-3017 or (509) 372-2935. Please provide me with a copy of the test report. Ecology approval will be required before operation of the pipeline.

Please contact me at (509) 736-5704, if you have any questions.

Sincerely,

Shri Mohan
Project Manager
Nuclear Waste Program
