

Waste Site Reclassification Form

Date Submitted: 3/9/2000	Operable Unit(s): 200-SW-1	Control Number: 2000-012
Originator: Jim Golden	Waste Site ID: 200-W-62	
Phone: 376-6961	Type of Reclassification Action:	
	Rejected: <input type="radio"/> No Action: <input checked="" type="radio"/> Interim Closed Out: <input type="radio"/> Closed Out: <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

Only a thin layer of coal, coal dust, and small piles of coal remain at the site. The large piles of coal have been removed.

Basis for reclassification:

A waste determination for Anthracite (Anthracite) was performed in 1994. A waste determination for bituminous coal dust was performed in 1996. The waste streams for both types of coal were determined to be nondangerous. It is recommended this site be reclassified to No Action.
