Debbi,

Please add this as a note to the Administrative Record for 224-B Engineering Evaluation/Cost Analysis:

- 1) The Comment-Response document and the Responsiveness Summary were not entered into the Administrative Record in a timely manner due to an administrative process problem. The comment-response development and review process was revised to ensure both program and regulatory personnel are involved in these processes.
- 2) At this time, the 224-B building removal action will be coordinated with the remediation of the B-Plant canyon.
