Dear Messrs. Sherwood and Stanley:

COMPLETION OF HANFORD FEDERAL FACILITY AGREEMENT AND CONSENT ORDER (TRI-PARTY AGREEMENT) INTERIM MILESTONE M-17-17

This is to inform you that the revised Tri-Party Agreement interim milestone M-17-17, "Cease Discharge of the UO₂/U Plant Waste Water to the 216-U-14 Ditch," was completed on November 28, 1994.

The UO₂ Plant deactivation team completed a Phase II deactivation activity by ceasing discharge to the 216-U-14 ditch. The final UO₂ Plant cooling water flows into the 207-U retention basin were shutdown on November 23, 1994, and a flow test performed over the Thanksgiving weekend to verify that basin inputs have been isolated. As no evidence of flow was found, the outlet valves leading to the U-14 ditch were lock-and-tagged closed on November 28, 1994. Rain water or steam condensate which accumulates in the basin will be allowed to evaporate.

If you have any questions, please contact L. D. Romine of the Transition Program Division staff, on (509) 376-4747, or myself on (509) 376-6340.

Sincerely,

for Paul J. Krupin
Acting Hanford Project Manager
