September 25, 1989

Mr. Ron Izatt, Director  
Environmental Restoration Division  
U.S. Department of Energy  
Richland Operations Office  
P.O. Box 550  
Richland, Washington 99352

Dear Mr Izatt:

Please be advised that I have recently been informed of the potential existence of a Hanford hazardous waste past practice site, located on the east side of the Columbia. This site has been reported as an abandoned Department of Defense munitions dump, whose contaminants include dioxin.

I am consequently asking that you confirm or deny the existence of this reported site, and, if true, that you provide me with copies of all documents delineating the site, wastes associated with it, and known environmental consequences. I would also appreciate your evaluation as to whether or not this site was recently included within USEPA's nomination package for the National Priorities Listing.

Your attention to this issue is appreciated.

Sincerely

Roger Stanley  
Hanford Project Manager
