

## Waste Site Reclassification Form

<b>Date Submitted:</b> 1/9/2001	<b>Operable Unit(s):</b> 200-SW-1	<b>Control Number:</b> 2001-02
<b>Originator:</b> J. W. Golden	<b>Waste Site ID:</b> 600-266	
<b>Phone:</b> 376-6961	<b>Type of Reclassification Action:</b>	
	Rejected <input checked="" type="radio"/> Closed-Out <input type="radio"/> No Action <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

**Description of current waste site condition:**

This site was discovered after the June 2000 fire removed the sagebrush hiding it. An area of about 20 by 20 meters (65 by 65 feet) had most of the trash, but other material trailed off to the north. Mostly pieces of metal debris were visible, with some glass, cinder blocks, and transite. The site had several 55-gallon drums with the ends removed and welded together to form one piece, laying on its side. Many other types of cans were also scattered about: 1-gallon food cans to 5-gallon paint/oil buckets, ammo boxes, batteries, sheet metal, radio parts, sheet metal, stove pipes, and a nearby long cable laid out in a straight line about 150 meters (500 feet) long, parallel to the road. There is no evidence of soil discoloration, but some dirt had blown over parts of the site after the fire, hiding part of the surface. This site is likely a military trash dump. It appears that the trash was dumped on the surface, and not in a pit that has filled in.

The debris was removed within a month after the fire exposed it.

**Basis for reclassification:**

Virtually all debris has been removed, only a few small scattered pieces and the cable remain.
