Mr. David L. Lundstrom  
Nuclear Waste Program  
State of Washington  
Department of Ecology  
1315 West 4th Avenue  
Kennewick, Washington 99336

Dear Mr. Lundstrom:

**IDENTIFICATION OF MISCELLANEOUS STREAMS REQUIRING BEST MANAGEMENT PRACTICES**

Reference: DOE/RL-93-94, "Plan and Schedule for Disposition and Regulatory Compliance for Miscellaneous Streams," dated December 1994.

40439

Enclosed is a table listing 96 miscellaneous streams that will be included in the Best Management Practices engineering report. The submittal of this table fulfills a commitment (Activity 6-1.1) established in the "Plan and Schedule for Disposition and Regulatory Compliance for Miscellaneous Streams" (Plan and Schedule).

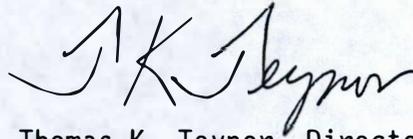

The State of Washington Department of Ecology (Ecology) approved the Plan and Schedule on February 9, 1995. As a result, a list identifying those miscellaneous streams requiring Best Management Practices is due to Ecology May 9, 1995. For the purpose of the Plan and Schedule, Best Management Practices means rerouting or eliminating miscellaneous streams that discharge to a surface contaminated area; discharge within 91 meters (300 feet) of an active or inactive crib, ditch, or trench; or have a potential for contamination. For streams that pose no significant threat to the groundwater, Ecology may approve a Best Management Practice option of "no further action" on a case-by-case basis. The "no further action" option would be used for minor streams for which no viable options for rerouting or elimination are feasible.

Mr. David L. Lundstrom
