Re: Laundry AKART Study

Dear Mr. Oldham:

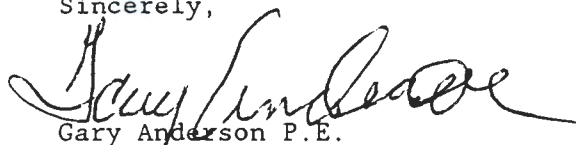

I have reviewed your AKART Study for the Hanford Decontamination Laundry Facility, Project B-503.

This report proposes to discharge wastewater which exceeds drinking water standards. It also states that this practice is permissible since Project WO-49 will treat the water further. I presume that this study was begun before the decision was made to discharge only treated water to the WO-49 system.

Since this project (B-503) proposes to discharge water well below standards, in fact below the standards proposed for Project CO-18 and the 300 Area NPDES permit, I will have to have this study evaluated by Bob King of our staff to determine if AKART has been achieved.

Mr. King has returned, but is scheduled for some training. We should be able to give you our comments by January 15. Since this is about a month after submission to us, I do not feel that we are being unresponsive.

Sincerely,

Gary Anderson P.E.
