TRI-PARTY AGREEMENT

Change Notice Number TPA-CN- 645	TPA CHANGE NOTICE FORM	Date: 11/18/14
Document Number, Title, and Revision: DOE/RL-2011-106, Surveillance and Maintenance Plan for the 105-N/109-N Reactor Safe Storage Enclosure		Date Document Last Issued: November 2011
Originator: Keith Grindstaff, US Department of Energy, Richland Operations (RL)		Phone: 509-376-1774

Description of Change:
The Surveillance and Maintenance Plan for 105-N/109-N (DOE/RL-2011-106) requires 5-year surveillance of the 105 N Reactor/109-N building. Section 3.0 allows for adjustment of surveillance frequency.

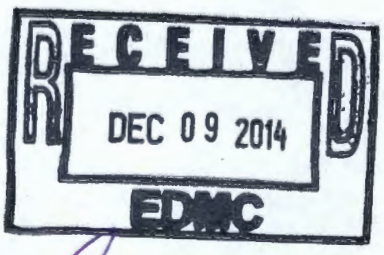
Rudy Guercia (DOE) and Rick Bond, Ecology (Lead Regulatory Agency) agree that the proposed change modifies an approved workplan/document and will be processed in accordance with the Tri-Party Agreement Action Plan, Section 9.0, *Documentation and Records*, and not Chapter 12.0, *Changes to the Agreement*.

The following updated language is authorized:

- In section 3.0, second paragraph the following will be added, "The first 5-year Surveillance and Maintenance will be conducted in CY2015."

Note: Include affected page number(s)

Justification and Impacts of Change:
As DOE-RL transitions areas from the River Corridor Closure to the Long-Term Stewardship Program (LTS) it has determined that it is more efficient to group all required reactor 5-Year entries at the same time. The first set of concentrated entries will occur in spring 2015. 105-N/109-N is not required for 5-year entry until 2017. However, the parties agree to move the date for inspection of 105-N/109-N to 2015 and subsequent inspections will occur on 5-year intervals thereafter as required.



Approvals:

Rudy Guercia, DOE Project Manager	11/18/14 Date	[X] Approved [ ] Disapproved
N/A, EPA Project Manager	Date	[ ] Approved [ ] Disapproved
Rick Bond, Ecology Project Manager	11/24/14 Date	[X] Approved [ ] Disapproved
